

# Genedata Ready-to-Run

## Scale Up Your Data Analysis to Match Your Instrument

Genedata and ForteBio have partnered to offer a Ready-to-Run integration, allowing direct and automated analysis of label-free experiments.

The integration ensures that data from ForteBio instruments can easily be analyzed in Genedata Screener, using current and future software versions.

The joint solution offers:

- ▶ Direct analysis of data from large and small molecule experiments
- ▶ Sample data association across systems and characterization techniques
- ▶ Automated pre-processing and analyses to reduce set-up time and expedite routine tasks

The Ready-to-Run integration covers:

- ▶ Octet RED384 System
- ▶ Octet HTX System

## Activate your Ready-to-Run integration:

Contact your Genedata Screener scientific account manager or your ForteBio account manager.

## If you have one solution and would like to add the other, contact:

screener@genedata.com  
fortebio\_info@moldev.com

## Genedata Ready-to-Run

Genedata Ready-to-Run provides out-of-the-box integrations for complex screening technologies. The integrations require little to no configuration, are instrument specific, come with defined functionality, and are maintained by Genedata as part of a software license agreement.

Go to [www.genedata.com/ready-to-run](http://www.genedata.com/ready-to-run) for the latest information on instruments integrated with Genedata Screener.

Genedata Screener® is part of the Genedata portfolio of advanced software solutions that serve the evolving needs of drug discovery, industrial biotechnology, and other life sciences.
