

Genedata Ready-to-Run

Scale Up Your Data Analysis to Match Your Instrument

Genedata and Nanion® have partnered to offer a Ready-to-Run integration, allowing you to directly analyze your APC data in a screening context.

The joint solution offers:

- ▶ Direct import of current and voltage traces, directly from the binary file
- ▶ Complete data analysis from current traces to IC50s in one environment
- ▶ Integration of your Nanion instrument into your screening workflow
- ▶ Analysis and combination of multiple events

The integration ensures that data from Nanion instruments can easily be analyzed in Genedata Screener, using both current and future software versions.

The Ready-to-Run integration covers:

- ▶ SyncroPatch 384PE

Activate your Genedata-Nanion Ready-to-Run integration:

Contact your Genedata Screener scientific account manager or your Nanion account manager.

If you have one solution and would like to add the other, contact:

Genedata Ready-to-Run

Genedata Ready-to-Run provides out-of-the-box integrations for complex screening technologies. The integrations require little to no configuration, are instrument specific, come with defined functionality, and are maintained by Genedata as part of a software license agreement.

Go to www.genedata.com/ready-to-run for the latest information on instruments integrated with Genedata Screener.

Genedata Screener® is part of the Genedata portfolio of advanced software solutions that serve the evolving needs of drug discovery, industrial biotechnology, and other life sciences.
