

Genedata Ready-to-Run

Integrate Your Sample Management and Your Analysis

Genedata has partnered with Titian Software to offer an integration allowing you to directly transfer your Mosaic data into Genedata Screener®.

The integration ensures that data from Mosaic can easily be accessed in Genedata Screener, using both current and future software versions.

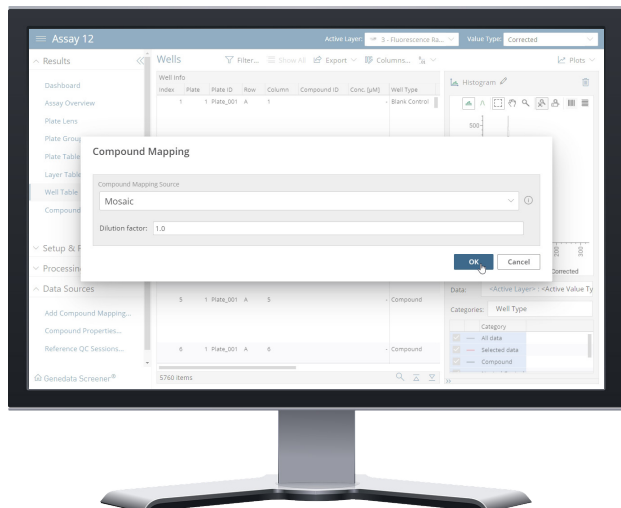

The joint solution offers:

- ▶ A single workflow from sample to screening results
- ▶ Removal of manual and time-consuming steps
- ▶ Lowered overall implementation costs

The Ready-to-Run integration covers:

- ▶ Mosaic*
- ▶ Mosaic SampleBank™*

*Starting with version 7.0

Activate your Genedata-Titian Ready-to-Run integration:

Contact your Genedata Screener scientific account manager or your Titian account manager.

If you have one solution and would like to add the other, contact:

info@titian.co.uk
screener@genedata.com

Genedata Ready-to-Run

Genedata Ready-to-Run provides out-of-the-box integrations for complex screening technologies. The integrations require little to no configuration, are instrument or system specific, come with defined functionality, and are maintained by Genedata as part of a software license agreement.

Go to www.genedata.com/products/screener/software for the latest information on systems integrated with Genedata Screener.

Genedata Screener® is part of the Genedata portfolio of advanced software solutions that serve the evolving needs of drug discovery, industrial biotechnology, and other life sciences.
