

Flexible Deployment for Any Digital Ecosystem.

Leverage Genedata. Your Way.

Don't have the time or internal resources to set up server hardware, install the Genedata Biopharma Platform, and maintain everything yourself?

With Genedata, you can choose an on-premises deployment or Software as a Service (SaaS) – securely hosted on Amazon Web Services (AWS).

Whichever option you choose – on-premises or in the cloud – you can access your Genedata solution online. Genedata can also handle the complete system maintenance for you.

Genedata has worked on hundreds of highly successful deployments for the world's leading biopharma companies and has unique expertise collaborating across scientific and IT groups.

During roll-out, we install the Genedata Biopharma Platform and integrate it with your existing infrastructure so users can get up and running fast – without requiring extensive internal IT support.

Eliminate complexity and capitalize on the full power of Genedata to transform R&D in your organization.

Available Through Genedata Deployment

- ✓ **Rapid Set Up & Configuration**
- ✓ **Monitoring & Proactive Maintenance**
- ✓ **Host Environment Optimization**
- ✓ **Regular Upgrade Installation**
- ✓ **Helpdesk for Expert User Support**

Select the Right Deployment Model for Your Digital Ecosystem

We connect your systems for a seamless data flow that boosts performance and eliminates complexity for faster decision-making and innovation across biopharma R&D. Explore our options.

SaaS

A continuously optimized hosting environment with regular updates, upgrades, and user support.

Core SaaS for growing biotechs and mid-sized pharma. Performant and cost-efficient.

Advanced SaaS for more complex IT landscapes. With dedicated cloud instances. Tailored to you.

On-Premises

Ideal for teams that require full, independent control over their environment, including:

- **Data and IP security**
- **Data sovereignty**
- **Deep integration with internal systems**

Supported by our scientific IT professionals.

Realized Value.

Powered by Genedata SaaS.

Up & Running. Fast.

With minimal configuration, the Genedata Biopharma Platform integrates seamlessly into your IT landscape – so your teams can start working immediately and focus on innovating.

Optimization. Hassle-Free.

Continuous upgrades ensure you always have access to cutting-edge features and improvements, keeping you ahead of the curve.

Productivity. Amplified.

By minimizing deployment and maintenance efforts, you reduce total cost of ownership while boosting productivity and accelerating your time to market.

Access. Democratized.

Eliminate excessive downloads and long wait times. Access the Genedata Biopharma Platform anytime while maintaining security and compliance.

Secure & Compliant. By Design.

Developed in alignment with regulatory standards, the Genedata Biopharma Platform ensures data security and data integrity.

Certified. Trusted. Compliant.

Operated in the Genedata Cloud, [it] automates our processes and ensures full data integrity and traceability across all groups. This foundational system allows us to scale efficiently and prepare for the next step – process modeling – while meeting global demand for high-quality biologics.
