

Genedata Ready-to-Run

Scale Up Your Data Analysis to Match Your Instrument

Genedata has partnered with IntelliCyt® to offer a Ready-to-Run integration, allowing you to directly analyze your IntelliCyt data in Genedata Screener®.

The joint solution offers:

- ▶ High-quality, consistent results across plates and experiments
- ▶ Automated, standardized, and scalable analysis workflow
- ▶ Simultaneous and interactive analysis of all plates from an experiment
- ▶ Direct import and quality control of cell- and well-level data
- ▶ Significantly reduced data analysis time for large campaigns

The integration ensures that data from IntelliCyt instruments can easily be analyzed in Genedata Screener, using both current and future software versions.

The Ready-to-Run integration covers:

- ▶ iQue® Screener
- ▶ iQue® Screener HD
- ▶ iQue® Screener PLUS

Activate your Genedata-IntelliCyt Ready-to-Run integration:

Contact your Genedata Screener scientific account manager or your IntelliCyt account manager.

If you have one solution and would like to add the other, contact:

Genedata Ready-to-Run

Genedata Ready-to-Run provides out-of-the-box integrations for complex screening technologies. The integrations require little to no configuration, are instrument specific, come with defined functionality, and are maintained by Genedata as part of a software license agreement.

Go to www.genedata.com/ready-to-run for the latest information on instruments integrated with Genedata Screener.

Genedata Screener® is part of the Genedata portfolio of advanced software solutions that serve the evolving needs of drug discovery, industrial biotechnology, and other life sciences.
